

Finishing The Task - INDIA

January 2012

UNREACHED

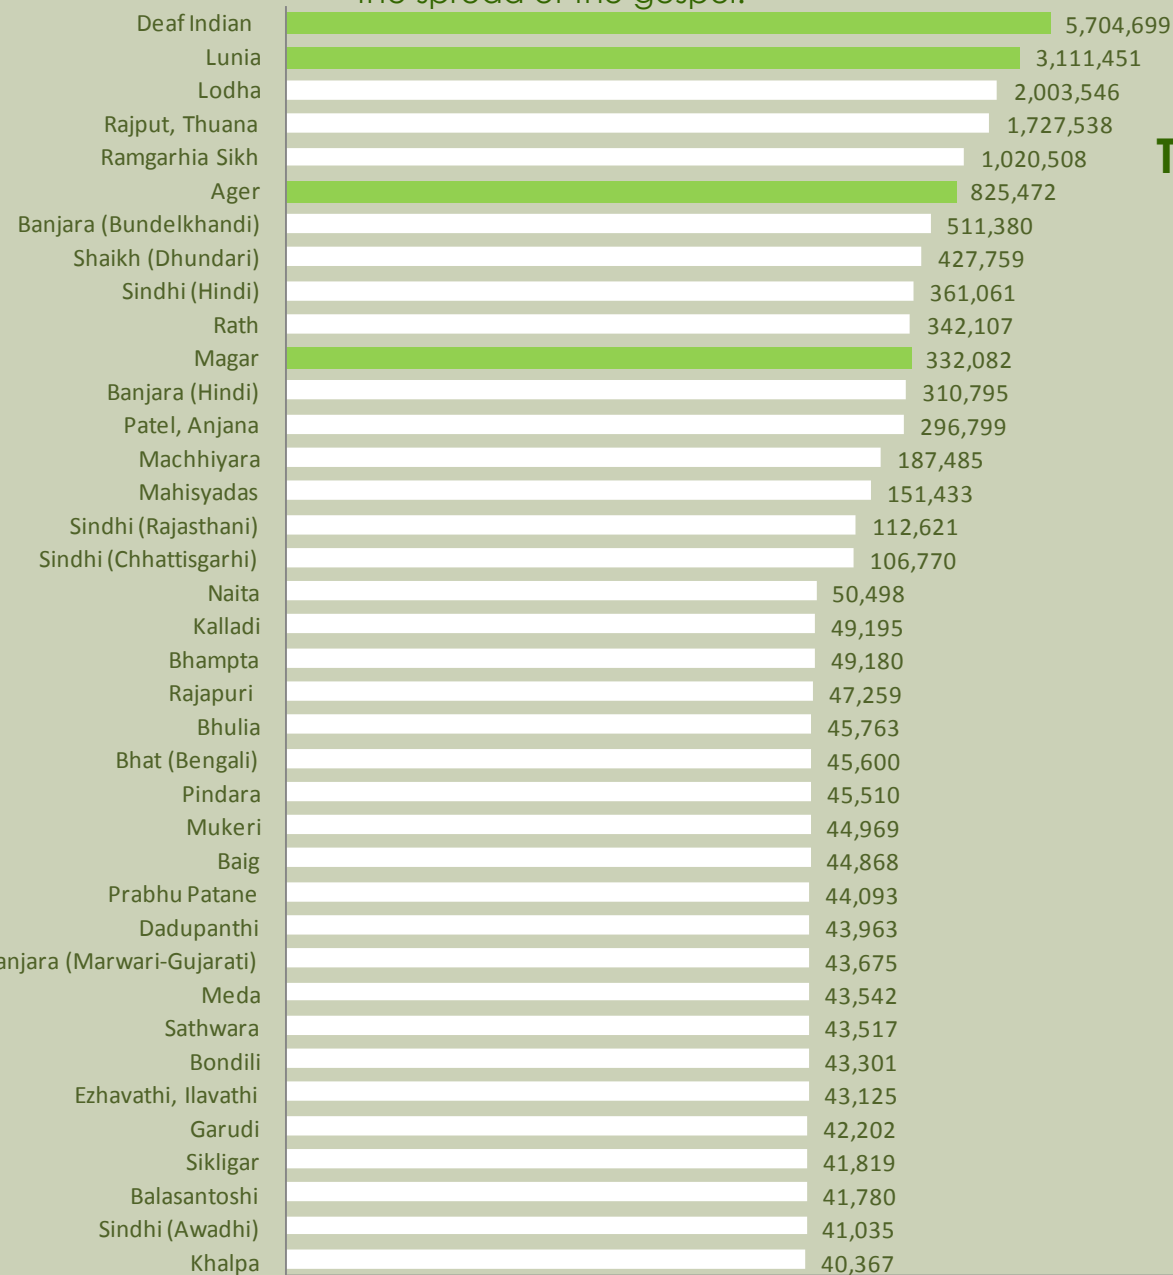

This is a group where a church planting movement does not exist because there is no indigenous church capable of reaching the group without cross-cultural missionary assistance.

UNENGAGED

These are groups where, as far as is known to researchers at present, there are no full-time Christian workers attempting to do evangelism and church planting.

PEOPLE GROUPS

Since 1992, missiologists have defined people groups as "... the largest possible group within which the gospel can spread as a viable church planting movement without encountering barriers of understanding or acceptance." To date, FTT has concentrated on ethno-linguistic groups because language understanding has been the main barrier to the spread of the gospel.
